

## **February 2017**

**Happy February Everyone! This month was spent working on the repeater receiver and also doing some maintenance and minor upgrades to the website. This month also is the one year anniversary of our website going online with our webhosting service.**

**New features include a calendar function for Ham Radio related events and also a Listen Live link so anyone can listen via WebSDR linked receivers from all over the globe.**

**The largest storm in 20 years did some minor damage to the repeater antenna feed, but will soon be back in operating condition.**

**Hoping that all this stormy weather leaves us soon as we start thinking about this year's upcoming Field Day. Not too soon to be experimenting with portable antennas and battery powered rigs.**

**Inquiries into our Field Day operations can be addressed to any link on our webpage. This year should see a large turnout for LARC as we may have new members in our midst!**
